Mr. and Mrs. Otis Richardson, of Pamplin visited Mr. and Mrs. Donald Dixon and family Sunday.

OYSTER SHELL
USED AS LITTER

Virginia poultrymen might want to borrow an idea from Iowa, and use oyster shell as nest litter, suggest poultry specialists at VPI.

The specilists say a recent Iowa report indicates that several poultrymen in that state have found oyser shell to be a good nesting material. They report it quite absorbent, not harmful if eaten, and a help in keeping the eggs shells white. Although the initial cost might be a little more than certain other nesting materials, if the bottom of the nest are kept tight to prevent the material from sifting through, oyster shell should no doubt last longer than many other products.

VPI specialists say they would like to hear from poultrymen who may try the oyster shell as litter.
